Texas Parks & Wildlife Presents Special Program: Wildlife Diversity/Non-game Wildlife

December 13 – Thursday – 7 pm

Central Park Community Center

2925 Fannin Street (Corner of Fannin & South 4th Street)

Beaumont, Texas 77701

What do these two species have in common?

Hint: If there are 59 game species of wildlife in Texas, guess who is looking after all of the rest? –Like the golden-cheeked warbler, the horned lizard, the whooping crane, and rest of the over 1,000 non-game species in Texas.

ANSWER: The Wildlife Diversity Program of Texas Parks & Wildlife Department

Come hear more about the people and the programs in TPWD that every wildlife supporter should know more about! John Davis, Wildlife Diversity Program Director, will present a special program on Thursday, December 13th at the Central Park Community Center located at 2925 Fannin & 4th Street. There will be refreshments at 7:00 PM with the program at 7:15 PM. Mr. Davis will have information on current wildlife diversity issues, how the Wildlife Diversity Program is funded, and most importantly, what is needed in the future to truly do a good job of stewarding wildlife diversity in Texas.

*This program is hosted by the **Big Thicket Association, Golden Triangle Audubon Sociality, Golden Triangle Sierra Club, and Sabine-Neches Texas Master Naturalist.***
